I've lost close to \$9.5 million dollars while working with Blockfi. I shouldn't even have any loan balances at this point.

I'm now lost all 3000 eth and have 35 btc left out of the 111 btc that I had with blockfi, with a loan balance still of over \$800k. I've paid over \$1million in monthly fees to blockfi. How can this be?

This should not be this way. I need help please.

Subject: another problem

I asked to liquidate my Eth loan as long as it paid off my btc smaller loan.

They did not do that and liquidated massively under the btc loan amount which now I can't pay that off. I need help. I've been calling all morning.

I need the liquidation reverse asap.
